Boston College: OFFICE FOR SPONSORED PROGRAMS

Guide on Cost Allocation Methodologies

Introduction

Boston College

and can be distributed in proportions that may be

approximated using reasonable methods; and 3) is necessary to the overall operation of Boston

College AND is assignable in part to the award.

Goods and services purchased by Boston College under a sponsored award may benefit more

than one sponsored award or cost objective. Such costs must be allocated to a sponsored award

in proportion to the actual benefit received by the award. To determine how much of the goods

or services are actually chargeable to an award, an allocation methodology must be developed

that reasonably estimates the actual benefit to the award. Costs are then distributed to each

benefiting sponsored award or cost objective using the allocation methodology.

Restrictions

It is important to note that costs may not be charged to an award to overcome fund deficiencies,

to avoid restrictions imposed by laws, regulations, or a sponsor's terms and conditions, or for

other reasons of convenience (e.g. charging a cost to a project simply based on the availability of

funds on that project).

F&A

Indirect costs, or costs considered to part of Facilities and Administration (F&A), are not eligible

for allocation directly to a sponsored award.

Proportional Benefit

If a cost benefits two or more projects or activities in proportions that can be determined without

undue effort or cost, then the cost must be allocated to the projects based on the proportional

benefit. This <u>must</u> be done for Federal awards per the Office of Management and Budget's Uniform
